Description:

Dimensions: 1244 x 1654

aperture: 10

credit:

camera: NIKON D50

caption: Another stylish camera from Universal Camera of New York, the Uniflash is a plastic camera made c1940 for Univex #00 rollfilm. Universal had the proprietary film made for them in Belgium, a fact that would eventually cause problems for the camera company. This example is shown topped with the Univex No. F-15 flash unit, sporting a Wabash Press 40 bulb. I felt I had to photograph this camera/flash unit with one of the "proper" bulbs specified in the user manual, clearly indicating that there's something wrong with me.
